

Press Release

CPI Vertex Antennentechnik offers large aperture Full Motion Triband Antennas for Lunar or Near Earth Missions.

20 Meter Full Motion Antenna System

Various worldwide space organizations recently announced Lunar and other near Earth Missions for different applications. CPI Vertex Antennentechnik GmbH located in Duisburg Germany has identified this demand and is prepared to deliver large aperture Antennas with 16.4, 18.3 and 20 meter in Diameter manufactured in Europe. Triband Feed Systems capable of receiving and transmitting in S, X, and Ka-Band are available. Triband feed systems have been validated in Remote Sensing (LEO) ground stations are in operation since several years.

We are ready to extend your Earth to Space Network and escort your Spacecraft to the Moon and beyond.
